

### Artist's Work 1

paint with paint  
paint with painted paint brushes  
paint with a hammer  
Modern Archaeology  
Mean Gleaning  
winding/stringing together  
bits and pieces of a world going to  
pieces because it can't get  
enough pieces  
because it can't get enough out of  
the pieces it's already got  
using material to get back  
to the sea full of lushness in the  
water/mermany objects

Unspecified personal keg  
head disorder

### D's words

Wabisabi  
topsy turvy  
transforming trashyness  
- of label only, into  
what it always had;  
the mater/motherliness  
of the material allowing  
birth again of the  
touchy/feely  
fondness for substance  
not just label upmanship

### Artists Work 2

getting something out of the western  
stream,  
heading to the middle of the pacific  
gyre gigantic tip  
just painting with  
very solid paint,  
bricolage making stuff  
composition context  
gleaning gleaming,  
grafting meaning  
onto precrafted stuff  
or taking away their proper use  
to get to the useless  
thing of art that may say  
that life doesn't have to be so full of  
robotic shit
